38	Open the app	Passed
39	Close the app	Passed

# IOS Guidelines

## Navigation Bars

1	A navigation bar appears at the top of an app screen, below the status bar, and enables navigation	Passed
2	When a new screen is displayed, a back button, often labelled with the title of the previous screen, appears on the left side of the bar	Passed
3	the right side of a navigation bar contains a control button	Passed
4	Navigation bars are accessible by default	Passed
5	<b>Standard back button</b>	Passed
6	<b>Text-titled buttons Should have enough room</b>	Passed

## Navigation Bar and Toolbar Buttons and Icons

Icon/ Button	Title	Description	Status
	Add	Creates a new item.	Passed
	Bookmarks	Shows app-specific bookmarks.	Passed
	Camera	Takes a photo or video, or shows the Photo Library.	Passed
Cancel	Cancel	Closes the current view or ends edit mode without saving changes.	Passed
	Compose	Opens a new view in edit mode.	Passed
Done	Done	Saves the state and closes the current view, or exits edit mode.	Passed
Edit	Edit	Enters edit mode in the current context.	Passed

	Fast Forward	Fast-forwards through media playback or slides.	Passed
	Organize	Moves an item to a new destination, such as a folder.	Passed
	Pause	Pauses media playback or slides. Always store the current location when pausing, so playback can resume later.	Passed
	Play	Begins or resumes media playback or slides.	Passed
Redo	Redo	Redoes the last action that was undone.	Passed
	Refresh	Refreshes content. Use this icon sparingly, as your app should refresh content automatically whenever possible.	Passed
	Reply	Sends or routes an item to another person or location.	Passed
	Rewind	Moves backwards through media playback or slides.	Passed
Save	Save	Saves the current state.	Passed
	Search	Displays a search field.	Passed
	Stop	Stops media playback or slides.	Passed
	Trash	Deletes the current or selected item.	Passed
Undo	Undo	Undoes the last action	Passed

# Tab Bar Icons and buttons

	Bookmarks	Shows app-specific bookmarks.	Passed
	Contacts	Shows the person's contacts.	Passed
	Downloads	Shows active or recent downloads.	Passed
	Favorites	Shows the person's favorite items.	Passed
	Featured	Shows content featured by the app.	Passed
	History	Shows recent actions or activity.	Passed
	More	Shows additional tab bar items.	Passed
	Most Recent	Shows content or items recently accessed within a specific period of time.	Passed
	Most Viewed	Shows the most popular items.	Passed
	Search	Enters a search mode.	Passed
	Top Rated	Shows the highest-rated items	Passed

# Home Screen Quick Action Icons and buttons

	Add	Creates a new item.	Passed
	Alarm	Sets or displays an alarm.	Passed
	Audio	Denotes or adjusts audio.	Passed
	Bookmark	Creates a bookmark or shows bookmarks.	Passed
	Capture Photo	Captures a photo.	Passed
	Capture Video	Captures a video.	Passed
	Cloud	Denotes, displays, or initiates a cloud-based service.	Passed
	Compose	Composes new editable content.	Passed
	Confirmation	Denotes that an action is complete.	Passed
	Contact	Chooses or displays a contact.	Passed
	Date	Displays a calendar or event, or performs a related action.	Passed
	Favorite	Denotes or marks a favorite item.	Passed
	Home	Indicates or displays a home screen. Indicates, displays, or routes to a physical home.	Passed
	Invitation	Denotes or displays an invitation.	Passed
	Location	Denotes the concept of location or accesses the current geographic location.	Passed
	Love	Denotes or marks an item as loved.	Passed
	Mail	Creates a Mail message.	Passed
	Mark Location	Denotes, displays, or saves a geographic location.	Passed

	Message	Creates a new message or denotes the use of messaging.	Passed

	Play	Begins or resumes media playback.	Passed
	Prohibit	Denotes that something is disallowed.	Passed
	Search	Enters a search mode.	Passed
	Share	Shares content with others or to social media.	Passed
	Shuffle	Indicates or initiates shuffle mode.	Passed
	Task	Denotes an uncompleted task or marks a task as complete.	Passed
	Task Completed	Denotes a completed task or marks a task as not complete.	Passed
	Time	Denotes or displays a clock or timer.	Passed
	Update	Updates content	Passed

# iOS Release Notes Checklist

Area	Description	Status
App Store	Purchases made using the Sandbox environment return	Passed
	Fixed an issue that prevented the system from automatically pushing subscription renewals to your app through the StoreKit 2 APIs in the App Store sandbox environment	Passed
	Using products(for:) in the App Store sandbox environment will now function in device simulators	Passed
Audio	Immediately after restarting your device, audio playback functions as expected	Passed
Authentication Services	allowedCredentials is now respected	Passed
CarPlay	When sharing your screen in a SharePlay session, connecting your phone to CarPlay doesn't fail.	Passed
	Users no longer see the vehicle compass overlap the resume button in map panning mode during active navigation	Passed
Focus	You're able to switch to a Focus other than Do Not Disturb using Siri	Passed
Guided Access	When using Guided Access with VoiceOver you can enter the Guided Access passcode to end Guided Access.	Passed

<b>Home</b>	You can pair with Matter accessories that use Thread	Passed
	You can pair a third-party app with Matter accessories through the app pairing flow if the accessory is already paired with another app.	Passed
	You can add a flow to a third-party app with Matter accessories if you haven't created an Apple Home.	Passed
<b>Home Screen</b>	After canceling a search in the widget gallery, the cancel button is not visible, which might blank out the widget gallery.	Passed
	The widget gallery no longer displays the wrong widget category after selecting a category from the sidebar	Passed
<b>iCloud</b>	If network connectivity is interrupted, the system no longer displays an inaccurate alert that iCloud Private Relay is incompatible with the network.	Passed
<b>Language &amp; Region</b>	Certain languages no longer display unlocalized text.	Passed
<b>Logging</b>	For every process crash, iOS no longer generates two crash logs	Passed
<b>Maps</b>	Rivers no longer disappear at certain zoom levels	Passed
	Buildings no longer overlap roads at certain zoom levels	Passed

<b>Privacy</b>	Record App Activity no longer defaults to off after a software update or restore from backup	Passed
	Background pushes will only be delivered if the app has been used in the foreground in the past few weeks	Passed
<b>Safari</b>	The Safari start page sync no longer requires devices that are on macOS Monterey 12 beta 3 and iOS 15 beta 3 or newer	Passed
	Safari search results are now scrollable on iPad	Passed
	Safari no longer crashes when you're closing tabs	Passed
	The iPhone tab bar now correctly minimizes and expands on scroll	Passed

# Android Guidelines

Area	Description	Status
Navigation	The app supports standard Back button navigation and does not make use of any custom, on-screen "Back button" prompts.	Passed
	The app supports gesture navigation for going back / going to the home screen	Passed
	The app correctly preserves and restores user or app state.	Passed
	The app preserves user or app state when leaving the foreground and prevents accidental data loss due to back-navigation and other state changes.	Passed
	When returning to the foreground, the app should restore the preserved state and any significant stateful transaction that was pending. Examples include: changes to editable fields, game progress, menus, videos, and other sections of the app or game.	Passed
	When the app is resumed from the Recents app switcher, the app returns the user to the exact state in which it was last used.	Passed
	When the app is resumed after the device wakes from the sleep (locked) state, the app returns the user to the exact state in which it was last used.	Passed

Notifications	Notification channels are defined according to best practices, rather than serving all notifications from one channel.	Passed
	Set timeouts for notifications where appropriate.	Passed
UI and Graphics	The app supports both landscape and portrait orientations (if possible) and folding / unfolding.	Passed
	Orientations expose largely the same features and actions and preserve functional parity. Minor changes in content or views are acceptable.	Passed
	<p>The app uses the whole screen in both orientations and does not letterbox to account for orientation changes, including folding and unfolding.</p> <p>Minor letterboxing to compensate for small variations in screen geometry is acceptable.</p>	Passed
Audio	Audio resumes when the app returns to the foreground, or indicates to the user that playback is in a paused state.	Passed
	<p>When the user initiates audio playback, the app should do one of the following within one second:</p> <ol style="list-style-type: none"> <li>1. Start playing the audio.</li> <li>2. Provide a visual indicator that the audio data is being prepared.</li> </ol>	Passed

Media	If the app plays video, it should support picture-in-picture playback.	Passed
Performance	The app loads quickly or provides onscreen feedback to the user (a progress indicator or similar cue) if the app takes longer than two seconds to load	Passed
Data & Files	All sensitive data is stored in the app's internal storage.	Passed
Policies	The app strictly adheres to the terms of the Google Play Developer Content Policy and does not offer inappropriate content, does not use the intellectual property or brand of others, and so on	Passed

## Mobile and web apps

Area	STP/expected result	Status
Installation	1. Download the app 2. Install the app	Passed
uninstallation	1. Open the app 2. Uninstall the app	Passed
update	1. Open the app 2. Search for any updates 3. Update the app	Passed
Launch the app	Launch the app by pressing the app button	Passed
Launch the app after an update	1. Update the app 2. Launch the app by pressing the app button	Passed
Close the app	1. Launch the app 2. Close the app	Passed
Close the app after an update	1. Launch the app 2. Update the app 3. Relaunch the app 4. Close the app	Passed
Minimise the app	1. Launch the app 2. Minimise the app	Passed
Maximise the app	1. Launch the app 2. Minimize the app 3. Maximize the app	Passed
Work in Wi-Fi network	1. Launch the app 2. Connect to a Wi-Fi network	Passed
All the buttons are aligned	Launch the app	Passed
All the icons are aligned	Launch the start screen	Passed
Typing capital Latin	1.Launch the app	Passed

letters	2.Type any information in any field using capital Latin letters	
Typing capital Cyrillic Letters	1.Launch the app 2.Type any information in any field using capital Cyrillic letters	Passed
Typing small Latin letters	1.Launch the app 2.Type any information in any field using small Latin letters	Passed
Typing small Cyrillic letters	1.Launch the app 2.Type any information in any field using small Cyrillic letters	Passed
Typing special symbols(@, #, \$)	1.Launch the app 2.Type any information in any field using capital special symbols	Passed
Typing Numbers	1.Launch the app 2.Type any information in any field using capital Numbers	Passed
Launch the camera	1.Launch the app 2.Allow the app to use the camera 3.Launch the camera	Passed
Typing punctuation marks	1.Launch the app 2.Type any information in any field using punctuation marks	Passed
Recording videos from front camera	1.Launch the app 2.Allow the app to use the camera 3.Launch the camera 4. Record a video	Passed
Taking photos from front camera	1.Launch the app 2.Allow the app to use the camera 3.Launch the camera 4. Take a photo	Passed

Sudden crash	1.Launch the app 2.Provoke a crash. The app should work correctly after the crash	Passed
Restart after sleep mode	1.Launch the app 2. Turn the sleep mode on 3.Turn the sleep mode off 4. Relaunch the app  The app should work correctly	Passed
Throttling test	The apps should work correctly if the CPU is overheated	Passed
localization test	There aren't any misprints and mistakes. All the elements of the interface are translated correctly	Passed
Check button functionality	All the buttons function correctly	Passed
Launch 2 apps together	The app under the test functions correctly	Passed
launch 3 and more apps together	The app under the test functions correctly	Passed
Faded screen	The app under the test works correctly after the	Passed
Maximum Brightness	The app should work correctly with maximum level of screen brightness	Passed
Minimum brightness	The app should work correctly with maximum level of screen brightness	Passed
Login Via Facebook	The users should be able to log into the app by using their data from Facebook 1.Launch the app 2.Create the account by using personal Facebook data	Passed

Login via Google account	<p>The users should be able to log into the app by using their data from Google account</p> <ol style="list-style-type: none"> <li>1.Launch the app</li> <li>2.Create the account by using personal Google account data</li> </ol>	Passed
Login via Apple ID	<p>The users should be able to log into the app by using their data from Apple ID</p> <ol style="list-style-type: none"> <li>1.Launch the app</li> <li>2.Create the account by using personal Apple ID data</li> </ol>	Passed
Login by entering personal data and password	<p>The users should be able to log into the app by</p> <ol style="list-style-type: none"> <li>1.Launch the app</li> <li>2.Create the account by using personal data <ol style="list-style-type: none"> <li>2.1 Enter your personal name</li> <li>2.2 Enter your password</li> <li>2.3 Press create account</li> </ol> </li> </ol>	Passed
Work with VPN via Wi-Fi connection	<ol style="list-style-type: none"> <li>1.Launch the app</li> <li>2.Connect to a Wi-Fi network</li> <li>3.Launch a VPN app</li> </ol> <p>The app should function correctly with a VPN app</p>	Passed
Work with VPN via Wired connection	<ol style="list-style-type: none"> <li>1.Launch the app</li> <li>2.Connect to a Wired network</li> <li>3.Launch a VPN app</li> </ol> <p>The app should function correctly with a VPN app</p>	Passed
Data synchronization	<p>The app should display the same information both on the mobile and web versions</p>	Passed
